Project's title: «**Reinforcing the National Referral Mechanism for the Protection of Human Trafficking Victims**» (MIS code 5009756)

The NCSS implements this project which is part of the Act entitled «Actions of the National Rapporteur on Combating Human Trafficking» from the National Programme of the «European Internal Security Fund/Police Cooperation for the period 2014–2020 period».

Its aim is to enhance the operation of the National Referral Mechanism for the Detection and Referral of Human Trafficking Victims (NRM), according to the JMD no. 30840 (GG3003/B/20-09-2016), which dictated the establishment, operation and management of the NRM by the National Centre of Social Solidarity and the supervision and coordination to the Office of the National Rapporteur on Combating Human Trafficking.

More specifically, it regards the full development of the National Referral Mechanism all over Greece, by creating a dynamic system of monitoring the protection provided as well as gathering data regarding the trends of the trafficking phenomenon and relevant developments.

This Plan included the following sub-projects:

- hiring personnel which will contribute in the full development of the NRM all over Greece with the cooperation of all the participating Actors - governmental and non-governmental such as the Police, the Asylum Service, the Labour Inspectors Service, Health Care Units, Psychosocial support Agencies of the Civil Society and others.
- training/informative meetings all over Greece held by NCSS personnel for the professionals of the aforementioned Actors
- creating an on-line platform, through which there will be an immediate filing of data regarding the detection of victims and the services provided to them by the participating Actors.
- publishing a handbook in Greek and English, which will present in detail the NRM operation, the institutional framework and the Actors' map.
- a brochure, which will explain in an easily understandable way the phenomenon and the rights of a trafficking victim as well as the NRM operation.

Project's Funding and Timeline: The total public expenditure is 631.831,16€, of which 75% (473.876,37€) will be granted by the European Union and 25% (157.958,79€), will be funded by national resources. The timeline is the following: **01/12/2017 – 15/10/2022.**
